

Author Guidelines for Manuscript Preparation (BAS Journal)

BAS Journal Manuscripts should be typed written with font Times New Roman of 11 pt, leaving adequate margins on all sides for reviewer's remarks and with double line spacing. All pages should have page number at the bottom of each page. our journal accept different types of articles like research articles, reviews, article-commentaries, book reviews, letters to the editor, case-reports/studies, etc.

Title - The title should be brief but comprehensive and limited to maximum of 30 words.

Author(s) affiliation- Author Affiliations should be in detail, along with their email address and Telephone.

Abstract- Abstract should be clear and convey the description of the study clearly and in a few words along with the significance of the work and scope of the research. The word count limit of Abstracts should be 300 words or less. Please avoid placing P-value, abbreviations or any references.

Keywords- A list of 3-5 keywords should be mentioned.

Introduction - The introduction should include a summary to indicate the importance of the study. The introduction should be in detail enough to draw the reader's attention.

Material and Methods– The materials section should include design, materials used, clear description of methods used and its analysis.

Results and Discussion– The result section should describe the experimental outcomes of an article. It should be clear, intelligible. In discussions section should be focused on primary results and compare with the other published work relevant with the same or closely related results, and the possible significance of the work.

Conclusions- This should clearly encapsulate the main completion of the work and underline its consequence and implications.

Acknowledgements- Acknowledgements should contain name of the person helped in carrying out such studies, grants, funds, etc. This part should be should be placed in a separate section before the reference list.

Conflict of Interest- Authors should declare the potential conflict of interests. All competing interests that are declared will be written at the end of published articles. Where an author gives no competing interests, the listing will read 'The author(s) declare(s) that they have no competing interests'.

References

All references cited in the text should be included in the reference list. In the text, the references should be presented numbered consecutively, in square brackets E.g.: [1] or [1,6-9,27]. Each reference must have an individual reference number. Authors are requested to provide at least one link for each reference.

Note: Only published or accepted manuscripts, should be included in the reference list.

Please use the following style for the reference list:

1. Journal article

Pati S, Chinnari S, Dash BP, Chatterji A, (2016) A Novel Food Formulation for the Juveniles of *Penaeus monodon* (Fabricius). Turkish J Fisheries Aqu Sci 16: 481-488.

2. Chapter in book

Ali A (1987) Status of Sea Bass, *Lates calcarifer* culture in Malaysia. In: J. W. Copland and D.L. Grey (editors), Management of Wild and Cultured Sea, 22.

3. Book edited

Faizah S, Pradeep PJ, Anil C (2011) TILAPIA: Aquaculture Techniques and Potential (2011) (Eds). A University Malaysia Terengganu publication, pp 340.

4. Paper presented in Conference

Chisters CGC, Stott JA (1956) The production of antibiotic substances by seaweeds, p. 49. In Proc. 2nd Int. Seaweed Symposium. Pergamon Press, New York 102.

5. M.Sc./Ph.D. Dissertation:

Chatterji A (1976) Studies of the biology of some carps, Ph. D. Aligarh Muslim University, Aligarh, India.

Figure and Tables

Figure captions and tables should be at the end of the manuscript. These should be used at a minimum and designed as simple as possible. We strongly encourage author to submit tables as .doc format. Each table should be on a separate page, numbered consecutively in Arabic numerals and supplied with a heading and a legend. Tables should be self-explanatory without reference to the text. Preferably, the details of the methods used in the experiments should be described in the legend instead of in the text. The same data should not be presented in both table and graph form or repeated in the text. Cells can be copied from an Excel spreadsheet and pasted into a word document, but Excel files should not be embedded as objects.

Note: If the submission is in PDF format, the author is requested to retain the same in .doc format in order to aid in completion of process successfully.

Figures: The preferred file formats for photographic images are PNG, TIFF and JPEG. If you have created images with separate components on different layers, please send us the Photoshop files.

All images must be at or above intended display size, with the following image resolutions: Line Art 800 dpi, Combination (Line Art+Halftone) 600 dpi, Halftone 300 dpi. See the Image quality specifications

chart for details. Image files also must be cropped as close as to the actual image as possible. Figure legends should be typed in numerical order on a separate sheet.

Tables and Equations as Graphics:

If equations cannot be encoded in Math ML, submit them in TIFF or EPS format as discrete files (i.e., a file containing only the data for one equation). Only when tables cannot be encoded as XML/SGML they can be submitted as graphics. If this method is used, it is critical that the font size in all equations and tables are consistent and legible throughout all submissions.

Supplementary information

Discrete items of the Supplementary information (for example, figures, tables) referred to at an appropriate point in the main text of the paper. Summary diagram/figure included as part of the Supplementary information (optional).

All Supplementary information is supplied as a single PDF file, if possible. File size within the permitted limits for Supplementary Information. Images should be a maximum size of 640 x 480 pixels (9 x 6.8 inches at 72 pixels per inch).

Open Access Policy

All the articles published under BAS are fully Open Access: immediately, freely available to read, download, and share. Articles are published under the terms of the Creative Commons Attribution License (<https://creativecommons.org/licenses/by/4.0/>) which permits use, distribution, and reproduction in any medium, provided the original work is properly cited. The license is subject to BAS journal open access terms and conditions. Authors are permitted to post their work online (e.g., in institutional repositories or on their website), as it can lead to productive exchanges, as well as earlier and greater citation of published work

Publication Ethics and Malpractice Statement

BAS Journal is committed to ensuring ethics in publication and quality of articles. The editorial board of BAS is responsible for preventing publication malpractices. Unethical behavior is unacceptable and plagiarism is not tolerated in any form. Authors, reviewers and editors are to be fully committed to good publication practice and take charge for fulfilling the following responsibilities.

Publication and authorship

Authors can suggest five potential reviewers - experts in the subject matter of the article - but the editorial board of BAS can accept or reject suggested referees.

The possible decisions include acceptance, acceptance with revisions, or rejection based on reviewers comments or editorial board decision. If authors are encouraged to revise and resubmit a manuscript, there is no guarantee that the revised submission will be accepted. Rejected manuscripts will not be considered for further reviewing process.

BAS is committed to complete reviewing process, if there is no response from any requested potential reviews. The editorial board can assign the manuscript to section editors to make final decision or reject the manuscript .Review articles should also be objective, comprehensive, and accurate. No research can be included in more than one publication.
